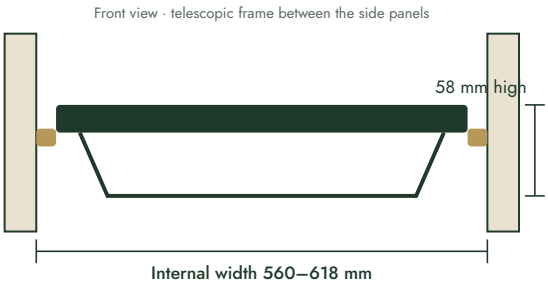
Trousers & jeans · Skirts · Scarves · Walk-in wardrobes · Fitted wardrobes · Dressing rooms

Wardrobe width

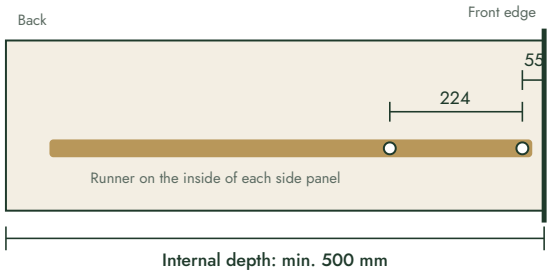
Front view of the wardrobe section



Fits an internal width of 560–618 mm – the frame adjusts by up to 58 mm.
Measure between the side panels at the height you will fit it.

Depth & fixing points

Side view of the side panel



Internal depth at least 500 mm. Product depth 483 mm.
Runner fixings: first 55 mm from the front edge, then 224 mm behind it.

Fitting in six steps

01 Plan the height
Decide where the pull-out goes and mark a level line on both side panels at the same height.

02 Mark the fixings
On each side, mark the first fixing 55 mm from the front edge and the second 224 mm further back.

03 Fix the runners
Screw a runner to the inside of each side panel on your marks, level and parallel.

04 Fit the frame
Set the frame width to suit, sit it on the runners and push it back until it clicks in on both sides.

05 Add the insert
Drop the trouser hanger into the frame and secure it with the end connectors.

06 Adjust and check
Pull it out fully and push it closed – it should run smoothly and close softly. Fine-tune the front if needed.

Good to know

- Check your wardrobe is square: measure the internal width at the front and the back.
- Leave enough room above the pull-out for what you will store in it.
- Fit the lowest pull-out first and work upwards.
- Soft close engages in the last part of the travel – a gentle push is enough.
- Spread the load evenly; do not stand on or climb on pull-outs.
- Wipe with a soft, damp cloth. No abrasive pads or solvents.

The ELITE trouser hanger – every wardrobe width
