Ideal for

Office drawers

Desk pedestals

Cabinet doors

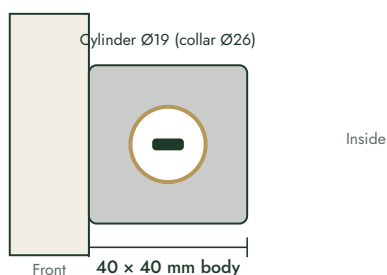

Medicine cabinets

Display cabinets

Garage storage

Lock body & cylinder

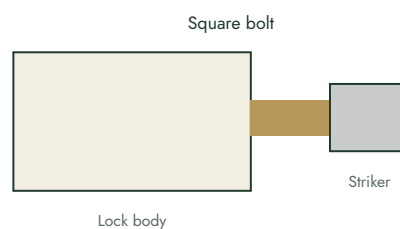

Inside view of the front

Drill for the Ø19 mm cylinder through the front; the collar (Ø26) sits on the outside face.

Striker

Bolt into the striker plate

Fit the striker last, lined up with the bolt with the door or drawer closed.

Fitting in six steps

01 Mark the centre

Mark the cylinder centre on the front, usually centred near the top edge.

03 Fit the lock

Push the cylinder through from the inside and screw the body to the back of the front.

05 Fit the striker

Close the door or drawer, mark the bolt position and screw the striker in place.

02 Drill the cylinder hole

Drill through for the Ø19 mm cylinder, with a scrap block behind.

04 Check the key

Turn the key to throw and retract the bolt.

06 Test

Lock and unlock a few times; adjust the striker if it binds.

Good to know

- Keep the second key somewhere safe.
- Use a sharp bit for a clean hole on the show face.
- Do not force the key – check striker alignment.
- Wipe chrome with a soft, dry cloth.
- A drop of graphite helps a stiff cylinder (no oil).
- Suits doors and drawers.

Two versions

KM 138 with steel keys, or ZN 138 with folding keys.

KM 138

ZN 138

SCAN TO ORDER
