Bedroom furniture

Media units

Length & fixing positions

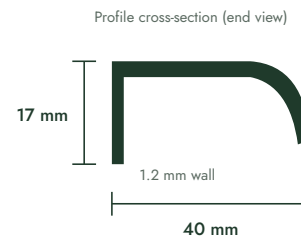

Front view of the profile

Hole centres 2 × 256 mm (3 fixings), centred on the length.
Fixings sit 42 mm in from each end.

Profile section

Dimensions from the manufacturer's drawing

40 × 17 mm aluminium profile, 1.2 mm wall.
Allow for the profile when setting gaps to worktops, ceilings and neighbouring doors.

Fitting in six steps

- 01 Plan the edge**
Decide which edge takes the profile: top edge for base units and drawers, bottom edge for wall units, leading edge for tall doors.
- 02 Check the gaps**
Make sure the door still clears the worktop, ceiling or next door once the profile is on.
- 03 Centre the profile**
Hold the profile in place on the edge and centre it on the door width (or run it full width).
- 04 Mark the fixings**
Mark through each fixing hole with a sharp pencil or bradawl.
- 05 Pilot drill**
Drill small pilot holes (about Ø2.5 mm). Take care not to come through the face of the door.
- 06 Fix and check**
Screw on with the supplied screws, starting in the middle.
Check the door opens and closes freely.

Good to know

- Fit one door first and check it against its neighbours before doing the rest.
- Use a depth stop on the drill so pilot holes never break through the front.
- For a continuous look, line profiles up across adjacent drawers.
- Anodised aluminium: wipe with a soft, damp cloth and dry.
- No abrasive pads, solvents or bleach.
- For indoor furniture. Keep away from direct heat sources.
