

CONCEALED SHELF SUPPORTS · GTV

Invisible Shelf Supports, *steel*

Concealed steel shelf supports that hide inside the shelf for a clean, floating look. The rod fixes into the wall or cabinet side with its plug, and the shelf slides over it.

PACK OF 4 OR 20

LOAD

10–25 kg / shelf

PER SHELF

2+ supports

MATERIAL

Steel

LOOK

Hidden

PACKS

4/20

USE

Wood shelves

Specification

Alcove shelves

Floating shelves

Wardrobes

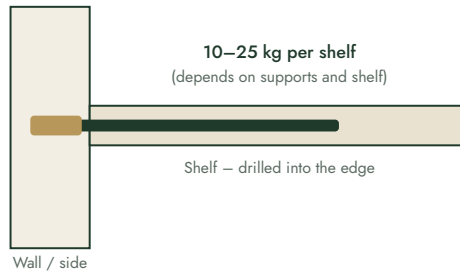

Cabinets

Living rooms

Bathrooms

How it fits

Section through wall and shelf

10–25 kg per shelf
(depends on supports and shelf)

Shelf – drilled into the edge

Rod into the wall, shelf over the rod. Drill the shelf edge to match the rod spacing exactly.

How many

Load guide

2 supports

short, light shelves

3–4 supports

longer or heavier shelves

10–25 kg per shelf, depending on the number of supports and the shelf material.

Fitting in six steps

01 Mark the line

Mark a level line for the shelf and the support positions.

02 Drill the wall

Drill to suit the plug and fix the supports, keeping the rods level and square.

03 Mark the shelf

Transfer the exact rod positions onto the back edge of the shelf.

04 Drill the shelf

Drill into the shelf edge, square and centred in its thickness.

05 Fit the shelf

Slide the shelf over the rods until it meets the wall.

06 Check

Check it is level and firm before loading.

Good to know

- Use a drilling guide to keep holes square in the shelf.
- Solid walls and solid shelves give the best result.
- Do not exceed the load guide.
- Spread weight evenly along the shelf.
- Check the wall for pipes and cables before drilling.
- Hidden fixing – nothing shows once fitted.

Pack sizes

Packs of 4 or 20.
