## Ideal for

Kitchen plinths

Utility units

Islands

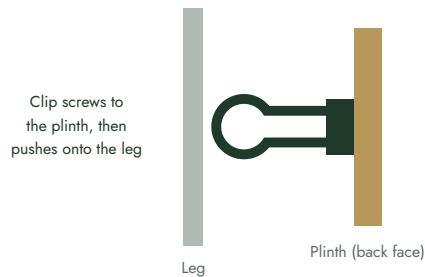

Bathroom vanities

Replacements

New fit-outs

## How the clip works

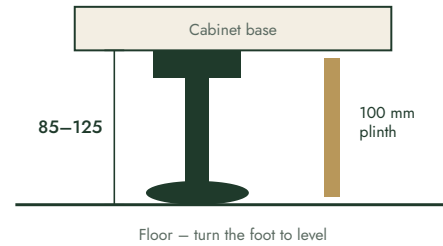

Plan view at a front leg

**Fix the clip to the plinth**, centred on the leg, then push it on.

## Leg heights

Side view of a base unit

Fits ML legs for 100 mm and 150 mm plinths.

## Fitting in six steps

- 01 Level the units**  
Set all the legs first so the units are level.
- 02 Cut the plinth**  
Cut the plinth to length and height, allowing a small gap at the floor.
- 03 Mark the legs**  
Hold the plinth in place and mark where each front leg sits.
- 04 Fix the clips**  
Screw a clip to the back of the plinth at each mark, at a height that meets the leg column.
- 05 Clip on**  
Line the clips up with the legs and push the plinth home.
- 06 Check**  
The plinth should sit straight and pull off easily when needed.

## Good to know

- Use short screws that do not come through the face of the plinth.
- One clip per front leg is usually enough.
- Add a clip near each end on long runs.
- Keep a few spare clips for future repairs.
- Clean with a damp cloth.
- For GTV ML legs only.

## Pack sizes

Packs of 10 or 50.
