Exact width	Cut ~2 mm under your width	Cut	In our Peterborough workshop

Ideal for

- Fitted wardrobes
- Walk-in wardrobes
- Alcoves
- Hallway cupboards
- Dressing rooms
- Utility rooms

Rail length

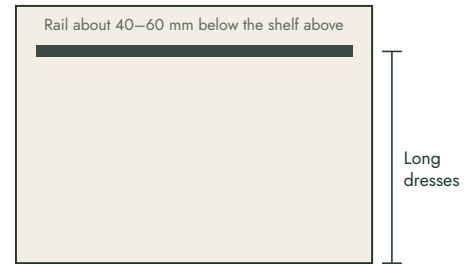

Front view of the wardrobe section

Measure the internal width W at the rail height. Exact-width rails are cut about 2 mm shorter to drop straight in.

Rail height

Typical hanging heights

Leave 40–60 mm above the rail so hangers lift off easily. Allow at least 1000 mm below for shirts, 1600 mm for long items.

Fitting in six steps

- 01 Measure**
Measure the internal width at the rail height, front and back.
- 02 Mark the height**
Mark the rail height on both side panels, level, centred front-to-back for most hangers.
- 03 Fix one support**
Screw the first end support to one side panel on the mark.
- 04 Fit the rail**
Slide the second support onto the rail and offer the rail into the first support.
- 05 Fix the second support**
Level the rail and screw the second support to the other side.
- 06 Hang and check**
Hang clothes and check the rail does not bow; add a centre support on wide runs.

Good to know

- For wide wardrobes, split the run with a centre panel and use open end supports.
- Fix into solid side panels with all the screws supplied.
- Keep the rail level so hangers do not slide to one end.
- The silicone insert stops hangers marking the rail.
- Wipe with a damp cloth; no solvents on the insert.
- Matches GTV ELITE colours.

Colours and lengths

Anthracite, black or white – 600, 800, 1000 or 1200 mm, or cut to your exact width.
