Kitchen doors

Drawer fronts

Wardrobe doors

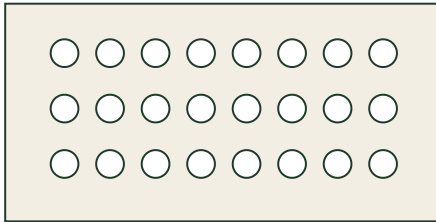

Cupboard lids

Glass doors

Non-slip pads

Size

Actual buffers on the sheet

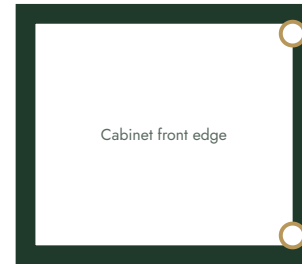

7 mm diameter · 1.5 mm thick · 100 per pack

Ø7 mm, 1.5 mm thick – a slim buffer that does not upset door gaps.

Where to stick them

Inside edge of the cabinet

One near the top and bottom on the opening side of each door, where it meets the cabinet.

Fitting in six steps

01 Clean

Wipe the area clean and dry; remove grease and dust.

03 Peel

Peel a buffer from the sheet without touching the adhesive.

05 Wait

Leave for a few hours before heavy use for best adhesion.

02 Position

Choose spots on the cabinet edge where the door or drawer front lands.

04 Press

Press firmly for a few seconds.

06 Check

Close the door – it should land softly and quietly.

Good to know

- Fit at room temperature for the best stick.
- Avoid freshly painted surfaces.
- Two per door is usually enough.
- Peel off cleanly to replace.
- Also works under ornaments and lamps.
- Keep the sheet sealed to stay clean.

Pack

100 buffers per pack.

Pack of 100
