Office storage

Stay fixing points

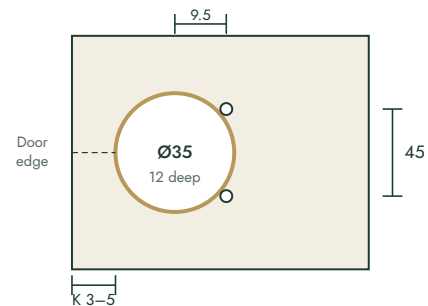

Side view, overlay hinges

Stay 184 mm down, 37 mm back from the front edge;
front bracket 91 mm from the top of the door.

Hinges on the top edge

Inside face of the door

Ø35 mm cups, 3–5 mm from the top edge of the
door; plates on the underside of the top panel.

Fitting in six steps

- 01 Weigh the door**
Weigh the door with its handle and choose Light, Medium or Strong.
- 02 Fit the hinges**
Bore the cups near each end of the top edge and fit the hinges.
- 03 Fit the plates**
Fix the plates to the cabinet top panel, in line with the hinges.
- 04 Hang the door**
Clip the door on and set the gaps.
- 05 Fit the stay**
Fix the MiniLift body to the cabinet side and the bracket to the door.
- 06 Test**
Lift and close the door — it should stay up and close gently.

Good to know

- Too weak and the door drops; too strong and it flies up — check the weight.
- Use two stays on wide or heavy doors.
- Fit to sound board.
- Keep fingers clear of the arm while fitting.
- Wipe with a dry cloth.
- Do not hang from an open door.

Three strengths

Light, Medium or Strong MiniLift with two hinges.
